C. W. ROSSELL.

Sporting Notes.

A fine burlesque on baseball was seen at the local grounds on Friday last, shortly after banking hours, when four good-sized sports engaged a dozen Tommies, Willys and Johnnies from grades 5 and 6. Some old tricks were put in use, as well as a few new ones. The big ones were shot a few times to cover all the points, and when a junior player got to 1st and ran on to 2d, the 1st baseman ran with him to cover that bag also. Later on when a big player was caught between 3rd and home, and a couple of juniors were trying to catch him out, the big player put on his hand, caught the ball and carried it to the home plate.

The seniors and juniors of the Football Club had a clash Friday night. The former were handicapped by the absence of three good players, but made a good showing. The Juniors were in fine trim and did some good work, assisted by their nifty goalkeeper Phil Fuhr.

The prospects for a successful baseball season appear to be very bright at the present time. The local committee is trying to organize a league which will include Evansburg, Duffield, Edson and Stony. If this is successfully accomplished, it will create a great deal of interest in baseball and a good crowd of rooters will certainly be on hand at every home game.

The outlook for football this season is not so good as could be wished. The good team at Rosenthal is not

likely to be in shape this season to do any good team work, and the team at Spruce Grove has lost several of its best players. However, Stony's team this year promises to be better than ever, and it is probable that they will be matched with some good outside teams which will put them on their mettle.

The Football Club held its organization meeting Monday evening last, and elected Hy Miller Jr as Capt., M Zucht as Manager, C W Rossell as Representative to the Sports Association; Committee, S C Elliot, Dr. Outway, and Henry Miller Sr.

Val Mohr Jr., that nifty young pitcher who did such excellent work last season, is now attending practices with the senior team.

The big Picnic at Comet on May 24th will be preceded by a big shoot which starts at 9:30 in the morning, and for which a splendid list of prizes is being hung up.

The local Tennis Club has received an invitation to attend the Tennis Tournament to be held at Edson on Victoria Day.

A basket ball game was played on the School grounds Friday night between two local teams, when the score was 12 to 8.

The ball team from Spruce Grove and a team from the Reserve at Winterburn are billed to play on the local grounds on the afternoon of the 20th. Some good playing should be seen.

LOCAL NEWS.

Miss Stella Beuerlein spent the week end with Mr and Mrs Kelly.

Mr H. Sinner has returned from a trip to Jasper, where his brother Philip has a position.

If J. Boettcher, Geo. Opertshamer and Henry Goerz have been under the doctor's care for the past week.

Miss Mary Miller, Edmonton, spent the week end at her home here.

Mr. D. Maisenko is now manager on the Van Horne ranch.

Henry Gabel returned yesterday from a week's trip to Jasper.

The fire apparatus for the town arrived here on Monday.

Dr. Walton took a bunch of young shooters to the Ranges on Saturday and scores of 27 and 26's were made.

St. Matthew's School was closed on Friday, owing to the illness of the teacher.

Mr Ph. Trapp made a large shipment of potatoes on Friday last.

The Parks Board will sell trees for planting at the same rate as last year—20c and 35c apiece.

Saturday morning's train from Vancouver was 3 hours and 30 minutes late.

Services were held in the Town Hall Sunday morning, by Rev Father Hughes, of the Roman Catholic Mission.

The early closing petition has been signed by practically all the business men in town, and it will be sent on to the Town Council to have a bylaw passed.

The local Trail rangers are arranging to spend Victoria Day with the other troops, of the Edmonton District on May 24.

In answer to several inquiries as to the date of another Box Social, it can be stated the next one will be held in Saint George's Park, when the weather permits.

Services in the Methodist Church next Sunday will be as follows—Sunday School at 11 a.m. At 7:30 p.m. members of Meridian Lodge, A.F. and A.M., will attend Divine service. Everybody cordially invited.

E. H. Pidgeon will be in Stony Plain, Saturday, May 19th, from 10:30 a.m. to 5:30 p.m. to receive taxes on account of Municipal District of Inga.

Call A National Coal Conference

Addressing the Canadian Club at London, Ont., recently, Sir Henry Thornton, President of the Canadian National Railways, dealt with the problem of making Alberta coal available for use by the people of Ontario—a subject discussed in this column in recent issues and which, because of its importance to all Canada, we venture to refer to again even at the risk of being wearisome.

In his address, Sir Henry Thornton said that, while unable and unwilling to tender any definite promise, it was just possible that coal could be brought from Alberta to Ontario without loss to the Government railways at a price that would practically eliminate the United States mining interests as serious competitors for Canadian patronage. Sir Henry added: "This is a big problem and I speak with every hesitation. It is largely a matter of freight rates. It may be possible that we shall be able to fix the rates in order that the coal may be brought to Ontario with a small profit to ourselves. We cannot, or will not, undertake to handle it at a loss."

Having made the above statement as to the position of all Canadian National Railways, Sir Henry uttered a warning to all other interests concerned when he declared that, should the C.N.R. find it impossible to adjust freight rates in such a manner as to transport Alberta coal to Ontario to compete with United States coal, the mine owners of Alberta and the distributors of coal in Ontario must shoulder their share of the burden and not increase their rates.

Summed up, the position in relation to this vital national question of an adequate fuel supply for the Eastern Provinces is, briefly, this: Alberta has the coal, lots of it; Ontario has no coal, is forced to buy from the United States, thus draining millions of dollars out of the Dominion and forcing up the adverse balance of trade against Canada, and in recent years Ontario has been unable to secure sufficient coal at any price from the United States to meet the needs of its people; the only obstacle in the way of replacing United States coal with Alberta coal is the long railway haul and consequent heavy freight.

The President of the C.N.R. says it is possible, but not probable, that the present freight rate can be reduced sufficiently to enable Alberta coal to compete with U.S. coal and still yield a small profit to the railway. Sir Henry distinctly says they will not haul coal at a loss—and, in view of C.N.R. finances, rightly so—but this does not imply that they would not haul at actual cost, assuming that the earning of even a small profit would operate to prevent the business altogether. If there was an existing coal traffic between Alberta and Ontario on which the railway was now making a profit, the C.N.R. might well hesitate to forego even this, but as no such traffic now exists, the railway would lose nothing by inaugurating a business which would entail no loss, even if it did not yield a profit.

The mine owners of Alberta should regard this question in the same light. They now have no business in Ontario: it is a new field for them, and, like most business men, they could well afford to supply coal to Ontario at a very small margin of profit, or even at cost for a period while developing that new market. Even so they would find it profitable because they would be able to so largely increase their output as to reduce all overhead expenses proportionately, and, by reason of providing steady, all-the-year-round employment for miners, greatly assist in solving one of their present big problems—labor, including hours of work and wages.

The Ontario coal distributors, too, must, as Sir Henry says, be prepared to do their part in this great national and economic development. Those now engaged in handling U.S. coal will probably be opposed to handling Alberta coal at a smaller commission or smaller margin of profit. If so, new agencies for the handling and distribution of Alberta coal in Ontario can assuredly be created, and arrangements made for the financing of such business on a small but safe margin.

It is not Ontario alone that is vitally concerned in finding a solution to this problem. The West is deeply interested, because anything that will lead to a partial solution of labor difficulties at the Alberta mines, that will reduce overhead costs of production and administration, and encourage larger production and further development must react favorably for all Western consumers of Alberta coal, both as to price, quality and quantity.

With the Canadian National Railways prepared to discharge its full duty in the inauguration of a true national coal policy, surely the time is ripe for the holding of a representative national conference of Governments, both Federal and Provincial, railway executives, mine owners, coal distributors, representatives of the miners themselves, and bankers, at which each group should lay their cards on the table and say what they are prepared to do to make such a national policy possible and a success.

No time should be lost in having such a round table conference take place.

Big Threshing Bill

Estimates recently made of the cost of threshing Saskatchewan's 1922 crop placed the figure at \$57,000,000, which is perhaps the biggest threshing bill on record.

Mother and Her Baby Are Relieved of Eczema

Mrs. Peter A. Palmer, Salt Burn, Sask., writes:
"Dr. Chase's Ointment has completely relieved me of eczema and piles. I also used this Ointment for my baby, who broke out in eczema. A few applications were all that was necessary in her case. Dr. Chase's Ointment has been worth a hundred dollars to me—before using it I had spent a great deal more than that in unsuccessful treatment from doctors. We have also used Dr. Chase's other medicines, the Nerve Food having restored my health after suffering from severe nerve trouble when a girl."

Speed of Birds

Aeroplanes Can Now Travel Faster Than Any Living Creature

Man has beaten the birds at their own game, observers declare. Records of over 200 miles an hour recently attained by aviators at Dayton, Ohio, is declared to be speedier than any other living creature we know of. Some species of hawks have a speed of 200 feet a second, or about 136 miles an hour. The canvas-back duck can fly from 150 to 160 feet a second, but its usual rate of 60 to 70 miles an hour would be pretty slow to be enjoyable in an airplane making a pleasure trip. The crow is the least rapid of a list of 22 migratory birds, flying an insignificant average of 45 feet a second or 20 miles an hour. Curlews and jacksnipes can fly 55 to 65 feet a second, while quails, prairie chickens and ruffed grouse can make 75 feet. The dove can reach a speed of 100 feet a second, or 68 miles an hour, although its usual rate is less. Red-heads, blue-winged teals, green-winged teals, Canada geese and different varieties of brant can fly over 100 feet a second, ranging in speed from 85 to 95 miles an hour, but usually fly at a much slower rate.

Painful Sprains, Bruises Restored By Nerviline

There is something new in Nerviline that has made it famous for nearly fifty years. It takes away the pain from sprains, bruises, rheumatism, neuralgia, and all other painful conditions. It is a powerful, yet gentle, restorative. It is a powerful, yet gentle, restorative. It is a powerful, yet gentle, restorative.

Crushed egg shells are excellent for cleaning pans, enamelled saucepans, and the like, and will remove every speck.

SATISFIED MOTHERS

No other medicine gives the same satisfaction to mothers as do Baby's Own Tablets. They are equally good for the newborn babe or the growing child and are absolutely guaranteed to be free from opiates or other harmful drugs. They are a mild but thorough laxative and cannot possibly do harm. They always do good. Concerning them Mrs. Joe Aché, Coteau Road, N.B., writes:—"I think that Baby's Own Tablets are a marvellous medicine for little ones. I gave them to my little girl with such good results that I now strongly recommend them to all mothers. The Tablets are sold by medicine dealers or by mail at 25 cts. a box from 'The Dr. Williams' Medicine Co., Brockville, Ont."

It is never too early to begin looking on the bright side of life. Do it now.

Requisite on the Farm.—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it is far surpasses anything that can be administered.

Increase in B.C. Mining

Output Last Year \$7,092,202 Over Previous Twelve Months

British Columbia mining production for the last year with a total output valued at \$35,158,843 shows an increase of 25 per cent. over the previous year, according to the report of the Hon. Wm. Sloan, Minister of Mines. The actual increase was \$7,092,202.

This year's production, it is estimated, will run over forty million dollars, and close to fifty million. The final returns for the year beat out the production of Mr. Sloan some time ago that the mining tide had turned and everything pointed to greater and more permanent business development than ever before, with a large increase in the number of properties working.

Conditions in British Columbia are now such, Mr. Sloan says, that they have reached a point "where a margin of profit for the miner is visible. It is extremely gratifying to note that the output for the year has only been exceeded three times in the history of mining in the province and that was in 1916, when production reached \$42,500,462, in 1918 when it was \$41,782,474, and in 1920 when the value was \$36,545,015."

ROYAL YEAST CAKES

MAKE PERFECT BREAD!
AN IMPORTANT PRODUCT OF CANADA

Bread is the finest food on earth—the one food that everybody eats—that everybody likes, and that agrees with everybody.

Bread made in the home with Royal Yeast Cakes tastes better, keeps fresh longer, and is more nourishing than any other.

Penalties for Defeat

How Failures Have Been Rewarded in Some Countries

Two hundred years ago the British executed Admiral Byng, of the name stock as our Governor-General, for getting beaten in a naval fight. We have got more sportsman-like ideas since then. For instance, Jellicoe, in his first Jutland despatch, seemed to consider that who won the battle was a mere detail, and that the great thing was the fine fight everyone had put up, especially the boy Cornwall. But in the Balkans they do things differently. Bulgaria has just sentenced six Cabinet Ministers to life imprisonment for having drawn her into the world war in 1916. Six generals also got prison and fines. This is in line with Greece, which recently executed the official responsible for the defeat in Asia. It is one way also of solving the expense difficulty about pensions for ex-Cabinet Ministers.

Apartment Hotel for Victoria

Plans are under way at Victoria for the erection of a modern apartment hotel to cost in the neighborhood of \$600,000. The proposed building is of a type that is being erected in large centres of population and is particularly adapted to the tourist trade. There has been a large increase in tourist traffic to Victoria and the Island during the past few years, many people coming from the Western States and the prairies.

Frogs that bark like dogs were discovered in the wilds of Santo Domingo by an exploration party.

Heaven helps those who help others to help themselves.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoacetic acid of Salicylic acid. While it is well known that Aspirin means Bayer Manufacture, to save the public against imitation, the Tablets of Bayer Company will be stamped with their general trade-mark, the "Bayer Cross."

Successful Cultivation Of Variety Of Small Fruits By Farmers Of Prairies

Compared with 1921, the year 1922 at the Morden Station, Manitoba, saw an increase of two hundred per cent. in the number of letters received, which made enquiry as to culture of fruits, 1922 W. B. Lewis, Superintendent of the Experimental Station. There is a decided tendency for farmers and others, on the prairies, to think about being more self-dependent in regard to foodstuffs and a pleasing tendency towards the improving of their home surroundings. In the light of the experiences at the different prairie experimental stations in growing fruits, it is evident that fruit plantations may successfully be established and maintained. Because of present economic conditions, and in the welfare of homemakers, the establishment of home fruit plantations may well be generally encouraged.

Any good wheat soil is suitable for most of the commercial hardy fruits. The soil is to be well worked, comparatively free from weed seeds, free from alkali, and is to have good natural drainage. If there are several exposures available, choose the northerly or north-easterly slope.

The next considerations are a substantial windbreak and selection of hardy varieties.

It is not necessary to delay setting out the fruits until the shelter develops. But the shelter belt should be planted, at the latest, the same year the fruit bushes, trees, etc., are set out. As temporary protection from the wind in summer, and to serve as a snow trap in winter, two or more rows of sunflowers may be planted about the fruit garden area. The sunflowers may be supported with a couple of rows of hemp. Hemp stands up through the winter and tends to grow taller than the sunflowers. The sunflowers are to be decapitated as soon as flower heads form, otherwise they will probably blow over. When the heads are cut off the stalks ripen up and most of them remain standing the following spring. The hemp is allowed to develop uninterrupted by any pruning. Hemp seed is sometimes difficult to secure and good results are more likely from home-grown seed, as the seed rapidly loses its vitality.

The permanent shelter belt may well include a closely planted hedge of caragana. For further advice in regard to the composition of the shelter, the recommendation is that enquiry be made to the chief of tree planting division, Department of Station, Indian Head, Sask., or to your nearest experimental station or agricultural college.

Best results are secured from a shelter belt which extends on all four sides of the fruit area. On the north and west have the windbreak sufficiently removed so that snow is allowed for snow drifts to accumulate. If the shelter is immediately against the fruit trees, grievous losses may be expected from crushing by snow.

Select those suited to your conditions. It is well to make direct enquiry of your nearest experimental station, as there are a number of different climatic zones on the prairies.

By way of general suggestion, set out raspberries, currants and plums. There are varieties of each of these types that are harder than is necessary for success in any normal year. Black currants are not so hardy as some red currants, but there are a number of varieties of sufficient hardiness.

Strawberries are worthy of continuous trial. The supply of moisture in May and June is apparently the chief limiting factor.

Crab apples may well be attempted in all localities and large apples are already successfully grown in Southern Manitoba and to a lesser degree at Indian Head, Saskatchewan.

Plums are the most attractive prospect in tree fruits. There are improved native varieties for the north and there are very excellent varieties, some of which carry a large proportion of Japanese plum character, in their constitution, for the south. Stand cherry hybrids, grown in bush form, are a valuable possession.

W. N. U. 1472

Migrating to Canadian Prairies

Romance in the Game of Settling Farm Lands

(By G. C. Porter of Winnipeg)

St. Paul, Minn.—There is romance in the game of settling farm lands from the viewpoint of this section of the United States. It was through this gateway that the Dakotas, Montana, Minnesota and Wisconsin received their crowds of homeseekers, the majority from abroad, Central Europe and Scandinavian countries supplying seasonal quotas, and it comes natural for the second generation of these pioneer people to migrate to the Canadian prairies and repeat the experiment in cheap lands. In other years these states have supplied the cream of the movement northward and there are many indications that the movement from this section will be heavy this year toward the Canadian prairies.

R. A. Garrett, a veteran of the service, and a keen mentality, is in charge of the St. Paul immigration station for the Dominion Government, while George Cook is the agent at Watertown, S.D., and W. E. Black is handling the Canadian Government's immigration business at Fargo, N.D. A. H. Davis is in charge of the Natural Resources Branch of the Canadian National Railways at St. Paul, and J. N. K. Macalister performs a similar duty for the Canadian Pacific Railway here. These gentlemen are very optimistic over the prospects of immigration and land buyers going north this spring. Their estimates of increased prospects vary from fifteen to thirty per cent. Mr. Davis went so far as to tell us that his inquiries and prospects are better today than they have been during the past seven years, and all agreed that the inquiries for land to buy, rent and homestead on the prairies and British Columbia were of a volume to be most promising.

Independent dealers in Canadian farm lands, of which there are many in these three centres of activity, are not so enthusiastic though they admit that prospects of doing business north of the line this season are better than for some years. I have been told by these independent salesmen, who represent a very considerable element of the speculators, that the wild land-tax on the prairies has made many of the American investors shy. They claim they can't interest the man who wants to buy large blocks of farm lands on the prairies or in British Columbia for purely speculative purposes on this account. Their business today is confined more to that class of people who want to buy improved farms on which to live in Canada.

Dual Shorthorns in Manitoba

Foundation of Herd Imported From England Twenty Years Ago

Special attention is paid at the Brandon, Manitoba, Experimental Farm, to the dual Shorthorn, and as a great many farmers in the province are taking to the strain, it is found impossible to supply the demand for good bull calves. The superintendent of the farm, in his report of the work accomplished in 1922, says that the foundation of the herd, which is now fully accredited, was a small importation from England twenty years ago, and that the herd was transferred from Ottawa twelve years ago. Since then, the milk producing ability of the herd has been developed and uniformity of type greatly improved. Bulls of good milk producing ancestry, in themselves good individuals both in regard to beef type and milk production, are used. Poor females are rigidly culled. At present the herd numbers seventy animals of excellent quality.

Okanagan Valley Fruit

Over two and a half million boxes of apples were shipped out of the Okanagan Valley in 1922, an increase of eight thousand boxes over the previous year. In addition there was shipped in 1922, 551,820 boxes of crab apples; 86,254 boxes of pears; 111,000 crates of plums; 155,209 crates of apricots; 109,091 crates of cherries; 9,683 crates of raspberries; 9,108 crates of strawberries; other fruits, 12,471 crates.

Electricity From the Air

Apparatus Extracts Juice From Oranges to Light Houses

Joseph Deszaffy, a young Hungarian engineer, he is only twenty-two years old, is reported to have invented an apparatus for extracting electric current from the air without the least expense. The chief feature of his device is a mast similar to those which are used for wireless telegraphy, and the electric energy gained from the air varies according to the height of the mast. He claims that 16^{1/2} would be able to reach forty thousand volts at an altitude of nine hundred feet. The inventor has fitted several houses with his apparatus, supplying electric current for their lighting. It has been observed that the current is strongest at noon and weakest at about midnight.

Further Irrigation Plans

Farmers in the district of Raymond and Magrath are forming an irrigation district to bring 60,000 acres under irrigation. They will apply to the government for enabling legislation, and for the guaranteeing of the bonds of the district. Work on the Lethbridge Northern Irrigation district is rapidly nearing completion, and it is expected that water will be turned into some of the ditches this year.

Heavy Grain Production For Last Year On The Western Indian Reserves

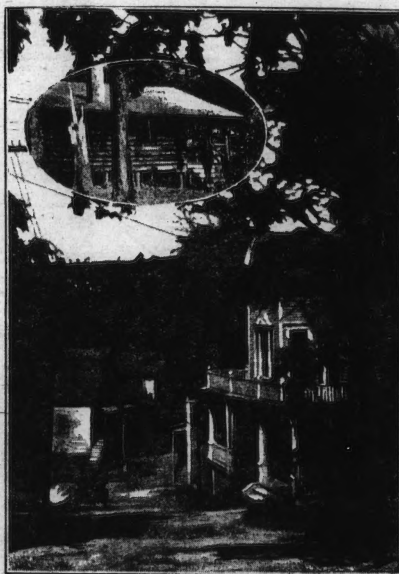

Newsprint Shipped to U.S.

Canada Supplied U.S. With 88 Per Cent. of Total Importation During the past year Canada supplied 88 per cent. of the total importations of newsprint into the United States, an increase of 3 per cent., as compared with the previous year. Shipments in 1922 amounted to 896,312 tons, as against 856,294 in the previous year. In addition to newsprint Canada supplies the United States with large quantities of pulp and pulpwood, which amounts to several millions of dollars in value each year.

Would Make Chicago Good

Morgan Collins, new police chief, has announced a determination to make Chicago a "one o'clock town." Collins asked Corporation Counsel Busch for an opinion on legality of closing all cabarets and cafes at that hour. The move is aimed at notorious "night" and "black and tan" cabarets which now run all night.

From a 19th Century Diary

If Bear River village has changed, its environs have not. Inset: Newspaper Camp attached to the Pine Hotel, Idaho, from which recent maps of the river may be made into the surrounding country.

Although there are now good roads, and up-to-date means of transportation through "The Land of Evangelism," it is interesting to read what Lt. Colonel Sleight, who rode in a coach with broken springs in 1852, thought of the country.

"We drove on to Kentville," he wrote, "and arrived there with a beautiful moon, shining in unobscured splendor. The hotel was delightfully situated on the banks of the River Gaspareux, a boiling, turbulent stream, which passed over a rocky bed with its countless foaming crests, here and there adding music to the ear, of falling water. What a spot for the angler! Trout and Gaspareux in surprising abundance amply reward his labors.

"For the disciple of Isaac Walton, Nova Scotia is happily situated. The whole province is indented with lakes and rivers, rivaling each other in their placatory riches. It is computed that 3,000 square miles are occupied with lakes and streams, from the mountain forest to the navigable waters. The whole surface of the country is studded with small lakes; and not more than fifteen miles in any direction can be found without one of these romantic sheets of water. The Moose and Bear Rivers, the St. Croix and Kennebec, the Gaspareux, La Hare, Tuxet, Shubascadie and

others, with their pretty Canadian and Indian names, invite to closer intimacy. In their wild beauty and serpentine loveliness they are unrivaled flowing between mighty forests or secret dells, with the grass green and untrodden.

"About six (next day), we approached Annapolis Royal, situated on a peninsula jutting out into the river of the same name, having on each side two expansive sheets of water, while opposite are a range of hills, wooded down to the river margin, and which did not add a little to complete a panorama of exquisite wildness and beauty. The situation of the town in my mind, is one of the prettiest and romantic in the lower provinces. On entering the town the nearly arranged hedgerows of English Hawthorn with prettily built villas, in gardens arranged with exquisite care and attention remind me forcibly of an English scene."

What Colonel Sleight wrote three-quarters of a century ago is true of conditions as they now are. Especially in the spring when the apple blossoms are in bloom, Nova Scotia, and particularly the west coast portion of the country, is a riot of color, wildness and beauty; nor does it lose its attraction for the tourist in the warmer season when the innumerable resorts and resorts along the coast line are in full swing.

That the Indians on the western reserves are advancing in 1922, they are advancing in the new conditions where they are not dependent alone on hunting and fishing, is told by Dr. Duncan C. Scott, Deputy Superintendent of Indian Affairs, in a recent number of "Natural Resources."

"When the bison disappeared from the western plains of Canada, the Indians, about thirty thousand in number, became a charge on the people of Canada. There were some persons who held that nothing better was to be expected than that the red men would have to be rationed and cared for by the Government as long as any of them remained. The Department of Indian Affairs, however, believed that, given opportunity and training, the Indians would in time become self-supporting, and thus an asset instead of a liability of the Dominion.

"In the nearly forty years that have passed since the Indians of the prairie provinces had to change their mode of living, the officers of the department have steadily labored to bring this about, often in the face of misunderstanding and discouragement. However, the efforts of the Indian industrial schools and the training given by the farm superintendents on the reserve have had their effect and today the outlook is most encouraging.

"The Indians in the west are not dying out, but are very gradually increasing in numbers and the results of their farming operations in 1922 show how far they have advanced in the way of self-support and independence. In the three prairie provinces of Manitoba, Saskatchewan and Alberta, Indian farmers harvested 745,529 bushels, equally divided between wheat and oats. In addition to this total of well up to three-quarters of a million bushels of grain, the Indians produced more than 70,000 bushels of potatoes and 47,250 tons of hay. They also summered about 200 much old land and "broken" so much new land that it is expected that they will have a larger area under crop this year than last. In the way of livestock, they own 18,000 horses and have over 25,000 head of cattle. They leased 200,000 acres of land for grazing purposes.

"Large as these figures are in the aggregate, they are all the more important when it is remembered how short is the time which the Indians have been farming. These gratifying results are both a reward of the faith of those who planned and carried out the training system and also a promise of still greater things in the future.

"When Hon. Charles Stewart, Minister of the Interior, who is also head of the Department of Indian Affairs, and Mr. Duncan C. Scott, the Deputy Superintendent General, visited a number of the western reserves on a tour of inspection last autumn, harvesting was in progress and they were struck with the big crops being garnered and also with the efficient farming methods used by many of the Indians, especially those who had been trained in industrial schools. They felt sure that the final returns would show good results for the season's operations, and the figures given above amply confirm their expectations."

Search For David's Tomb

Sacred Sites Will Not Be Upset By Excavations

The recent announcement that excavations are to be made at Jerusalem in a search for David's tomb has aroused anxiety in some religious circles in London, where it was feared that the work would devastate sacred sites.

The colonial office, however, has issued a re-assuring statement asserting that the actual location of the ancient City of David was not on the spot mentioned by tradition. Archaeologists long ago established the statement, says that the city stood on a little triangular square of ground called Mount Ophel, south of the present Jerusalem. It is on this site, which has heretofore been of no religious interest to Christians, Jews or Mohammedans, that the excavations in the search for David's tomb are to be made.

(Continued)

"Yes," he nodded. "I believe it is." "Somebody was with Race?" Her voice was a blend of attempted confidence with distressing doubt.

"My dear, I have painful news for you."

"In Gordon?" The question was almost a sob. "Who, father? Dorothy Purnell?"

Helen dropped into a chair, and going to her, the Senator placed his hands on her shoulders. She looked shrunken, years older, with the bloom of youth blighted as frost strikes a flower, but even in the first and worst moments of her grief there was dignity in her.

In a measure Race Moran had prepared her for the blow; he, and what she herself had seen of the partnership between Dorothy and Gordon.

"You must be brave, my dear," her father soothed, "because it is necessary that you should know. Race came upon them here last night, in each other's embrace, I believe, and with the girl's help, Wade got the upper hand."

"Are you sure it was Gordon?" Her cold fingers held to his warm ones as in her childhood days, when she had run to him for protection.

"His quilt is there on the desk."

"But why should they have come here, father—here of all places? Doesn't that seem very improbable to you? That is what I can't understand."

"Why didn't he go to her house?"

"For fear of arrest, I suppose. Their reason for coming here, you have half expressed, Helen, because it offered them the safest refuge after that time of night, in Crawling Water. The office has not been used at night since we rented it, and besides Moran has been doubly busy with me at the hotel. But I don't say that was their sole reason for coming here. The safe had been opened, and doubtless their chief motive was robbery."

"She sprang to her feet and stood facing him with flaming cheeks, grieved still but aroused to passionate indignation."

"Father, do you stand there and tell me that Gordon Wade has not only been untrue to me, but that he came here at night to steal from you; broke in here like a common thief?" Her heart heaved violently, and in her eyes shone a veritable fury of scorn.

The Senator met her outburst

WHAT IS OFFERED FOR MONTHS

Weak and Nervous. Made Well by Lydia E. Pinkham's Vegetable Compound

Webbwood, Ont.—"I was in a very weak and run-down nervous condition, always tired from the time I got up until I went to bed. Sleep did not rest me at all. My sister recommended Lydia E. Pinkham's Vegetable Compound to me and others told me about it. I took it, it did not take long until I felt stronger, headaches left me and my appetite came back to me. I am a farmer's wife and have many things to do outside the house, such as milking, looking after the chickens and other chores. I heartily recommend the Vegetable Compound to all who have the same trouble I had, for it is a fine medicine for women."—MRS. LOUIS F. ELIASSEN, Hillcrest Farm, Webbwood, Ont.

Another Nervous Woman Finds Relief

Port Huron, Michigan.—"I suffered for two years with pains in my side, and if I worked very much I was nervous and just as tired in the morning as when I went to bed. I was sleepy all the day and didn't feel like doing anything, and was so nervous I would lose my temper. One of my friends told me about Lydia E. Pinkham's Vegetable Compound, and it helped me so much that I soon felt fine."—MRS. CHARLES BEELER, 601-14th St., Port Huron, Mich.

Women who suffer from any feminine ailment, should try Lydia E. Pinkham's Vegetable Compound.

W. N. U. 1472

gravely as became a man in his position. He spoke with judicial gravity, which could leave no doubt of his own convictions, while conveying a sense of dignified restraint, tempered with regret.

"He not only did so, my dear, but he succeeded in escaping with documents of the greatest value to us, which, if prematurely published, may work us incalculable harm and subject our motives to the most grievous misconception."

She lifted her head with so fine a gesture of pride that the Senator was thrilled by his own paternity. Before him, in his child, he seemed to see the best of himself, purified and exalted.

"Then, if that is true, you may do with him what you will, I am through."

He knew her too well to doubt that her renunciation of Wade had been born from the very roots of her nature, but for all that, when she had spoken, she was not above her moment of deep grief.

"My little girl, I know—I know!" Putting his arms around her, he held her while she wept on his shoulder. "But isn't it better to find out these things now, in time, before they have a chance to really wreck your happiness?"

"Yes, of course," She dried her eyes and managed to smile a little. "I'll write to Maxwell to-day and tell him that I'll marry him. That will please mother."

It pleased the Senator, too, for it meant that no matter what happened to him, the women of his family would be provided for. He knew that young Frayne was too much in love to be turned from his purpose by any misfortune that might occur to Helen's father.

CHAPTER XIV.

A Dastard's Blow

At about the time when Rexhill was freeing Moran from his bonds, Wade and Santry, with rifles slung across their backs, were ranging the banks of Plah Creek. In the rocky canyon, which they finally reached, the placid stream narrowed to a roaring torrent, which rushed between the steep banks and the huge, water-worn boulders, with fury uncontrolled.

Neither of the cattle men greatly feared the coming of a second posse, at least not immediately; but for the sake of prudence, they went armed and carried a careful watch.

Wade mounted at Wade Moran, who in his young days had prospected in California, squatted over a sandy, rock-rimmed ledge, and waited for the posse to come. One glance at the fine, yellow residue in the bottom of the pan decided him.

"Well, I triumph!" he yelled that echoed and re-echoed through the gorge, he sprang to his feet.

"Whoop-e-e-e! I've struck it!" He shouted excitedly, as Wade ran up to him. "Look here!"

The old man held out a small handful of the yellow dust.

"Wade drew a long breath.

"Gold! It's true, then!"

"You betcher, and it's the richest pay-dirt I've met up with. No wonder Moran has been willing to do murder to get a-holt of this land. You're a rich man, boy; millionaire, I reckon."

"You mean that we are rich, BH?" The younger man spoke slowly and emphatically. "Whatever comes out of here"—he waved his hand toward the creek—"is one-half yours. I decided on that long ago. Never mind asking me why." He clapped Santry on the back. "It's because we're partners in a fact that in name we are."

"Because you've stuck with me through all the lean years. That's reason enough."

The old plainsman carefully emptied the dust back into the pan before he said anything.

"Have you gone clean crazy?" he finally demanded. "Givin' away a fortune like this was the mark of a cleanest?"

"If you have, I ain't. This stuff's yours. I'm not sayin' that you ought to take a ouce or two, maybe, of this offer to do, for old times' sake, if you offer it to me, but that's all." His wrinkled face twisted into a grin.

"You'll be needin' it all one o' these days to pay for your homeownin', if fortune like it was the mark of a cleanest?"

He laughed softly as Wade flushed. "Shake, boy! Put 'er there! I wish you all the luck that comin' to any white man, by the great horned toad, I do!"

During the whole of the morning they examined the creek bed and they found signs of the yellow metal almost everywhere. At one place Wade broke a knob of rock from the face of the cliff, the under surface of which was seamed and streaked with golden veins. Santry could scarcely restrain himself; usually taciturn, he was for once as light-hearted and joy-

ous as a boy. But on the way back to the ranch-house he became serious.

"Say, ain't the bulk of that fode on that forty-acre tract that you took up as a timber claim?" he asked.

"Yes," Wade answered. "That is I think so. We can run over the lines this afternoon and make sure."

"I reckon we'd better make sure, and if it is, you'll have to lay low until you get your deed. Your homestead rights might be hard to claim now that there's mineral in the ground. Moran'll most likely keep his mouth shut for reasons of his own, and he may not know about your not havin' proved up yet, but some other Jasper might get wise."

"I don't think any one around here would contest my right to the land, BH?" Wade replied thoughtfully.

"Still, as you say, we'd better be careful. The gold will keep. We haven't heard the last of Moran and his crowd yet, not by a jugful." He chuckled grimly. "I wonder if anybody's cut him loose yet."

"I reckon they have, boy. He'll keep monkeyin' around this territory until he meets up with some feller like me, with a bad temper and a quick gun hand, who'll make him good the same way we uster make good Indians. Hello, steady!"

Although they were now in sight of the house and the men hanging about it for the noon-day meal, Santry had not relaxed his caution and his eyes had picked out two moving dots in the distance which presently developed into galloping horses. He smiled instantly.

"Can't be nobody lookin' for trouble," he observed, and presently his eyes twinkled. "Take a good look, boy. I reckon you know one o'em, anyhow."

The horses came on rapidly, until upon the foremost of them Wade could see the fluttering skirt of a woman, while the other he recognized as belonging to Lem Trowbridge, even before he could clearly make out the rider.

"Tell the cook we'll have company to dinner," Wade called to Santry as he untied a horse from the hitching rack near the barn, and turned to meet the newcomers.

With fine prescience, Trowbridge, when he saw him ride toward them, drew his horse down to a walk, and so was directly in the rear when Dorothy and Wade met.

"Mighty glad to see you," he greeted her, "but that goes without sayin'."

"Thanks," she responded, hoping that he would attribute the heightened color of her cheeks to the exertion of the ride. "We thought we'd ride out to see how you were getting along."

Despite her blush, that had come at the recollection of his kiss the night before, she still looked him straight in the eyes, but with a sweet humility, an attitude of surrender, which he understood, and which touched him.

There was nothing bold about her look, but an engaging womanliness, which would have appealed to any decent man, even while it stirred his pulse.

She wore a wide felt hat, from beneath the brim of which her hair floated, shaken out of its moorings by the jolting of her gallop. A least white blouse, which she wore coming, and a divided skirt completed a sensible costume, which seemed to Wade Moran, who in his young days had prospected in California, squatted over a sandy, rock-rimmed ledge, and waited for the posse to come.

One glance at the fine, yellow residue in the bottom of the pan decided him.

"Well, I triumph!" he yelled that echoed and re-echoed through the gorge, he sprang to his feet.

"Whoop-e-e-e! I've struck it!" He shouted excitedly, as Wade ran up to him. "Look here!"

The old man held out a small handful of the yellow dust.

"Wade drew a long breath.

"Gold! It's true, then!"

"You betcher, and it's the richest pay-dirt I've met up with. No wonder Moran has been willing to do murder to get a-holt of this land. You're a rich man, boy; millionaire, I reckon."

"You mean that we are rich, BH?" The younger man spoke slowly and emphatically. "Whatever comes out of here"—he waved his hand toward the creek—"is one-half yours. I decided on that long ago. Never mind asking me why." He clapped Santry on the back. "It's because we're partners in a fact that in name we are."

"Because you've stuck with me through all the lean years. That's reason enough."

The old plainsman carefully emptied the dust back into the pan before he said anything.

"Have you gone clean crazy?" he finally demanded. "Givin' away a fortune like this was the mark of a cleanest?"

"If you have, I ain't. This stuff's yours. I'm not sayin' that you ought to take a ouce or two, maybe, of this offer to do, for old times' sake, if you offer it to me, but that's all." His wrinkled face twisted into a grin.

"You'll be needin' it all one o' these days to pay for your homeownin', if fortune like it was the mark of a cleanest?"

He laughed softly as Wade flushed. "Shake, boy! Put 'er there! I wish you all the luck that comin' to any white man, by the great horned toad, I do!"

During the whole of the morning they examined the creek bed and they found signs of the yellow metal almost everywhere. At one place Wade broke a knob of rock from the face of the cliff, the under surface of which was seamed and streaked with golden veins. Santry could scarcely restrain himself; usually taciturn, he was for once as light-hearted and joy-

ous as a boy. But on the way back to the ranch-house he became serious.

"Say, ain't the bulk of that fode on that forty-acre tract that you took up as a timber claim?" he asked.

"Yes," Wade answered. "That is I think so. We can run over the lines this afternoon and make sure."

"I reckon we'd better make sure, and if it is, you'll have to lay low until you get your deed. Your homestead rights might be hard to claim now that there's mineral in the ground. Moran'll most likely keep his mouth shut for reasons of his own, and he may not know about your not havin' proved up yet, but some other Jasper might get wise."

Britain Buys Canadian Cans

According to reliable information Canada supplied 1,534 of the 2,025 automobiles imported by Great Britain during the month of January, as compared with 216 furnished by the United States, 205 by France and 49 by Italy.

Praises this Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief, though he has tried for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere.

A strong white fibre, of greatest importance to textile industries, is now obtainable from the beans of pinapples.

Worms cause fretfulness and rob the infant of sleep, the great source of Mother Graves' Worm Extremator will clear the stomach and intestines and restore healthfulness.

The deposits of nickel near Sudbury, Ont., were discovered in 1885 by Mr. McConnell, while looking for tie-wood for the Canadian Pacific Railway, then in course of construction.

Children Cry for Fletcher's

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulence, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and all the ailments of the Bowels, and aiding the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

THE CENTAUR COMPANY, NEW YORK CITY

Minard's Liniment for Falling Out of Hair

Spruce Grove.

Two very interesting games of ball were played here on the 13th inst. The first game was played between a team from Stony Plain and the local ball tossers. Following are the line ups—

Stony Plain—Mohr, Ted Zahn, G Graden, Laird, Wood, Sam Zucht, H. Miller Jr, E. Heichen, Moyer.

Grove—J Miller, F Loeblich, H Loeblich, T Pinchbeck, Jac Miller, "Frenchy," J Bristow, Ray Graden, Val Schulz.

Umpire—Ph Fuhr.

The play was good and fast all thru, R Graden and H Loeblich making home runs, as well as half a dozen visiting players doing the same thing.

Score—Stony Plain 11; Grove 6.

The second game was played between a team from the Reserve at Winterburn and the Stony Plainers, winners of the first game. Stony Plain's line up was much the same as in the other game, with one or two exceptions.

Indians—J B Thomas, W Moran, W Stony, G Lanasoo, Gus Moren, J Gordon, John Ropai, M Horsthiiff, W Calder.

Umpire—H Loeblich.

The Indians started in with the full determination to whitewash their opponents, but were greatly surprised that, on their first trip to bat, none got to first. Stony town's players didn't seem to get their wind till the end of the second inning, but from then on it was a regular procession around

GUS ZUCHT.

the bags. Stony Plain made a number of home runs in this game, including Sam Zucht's career off the Bank roof in the third.

The white man's persistent slugging necessitated the Indians' outfielders getting up search parties for lost balls.

At the beginning of the fifth the score stood about 21 to 1, but in this inning the Indians bunched their hits and made the score 21—5.

A prominent sportsman from Stony Plain added much to the gaiety of the occasion and ably assisted on the couch line with large chunks of advice at what he considered critical periods of the game.

Here and There

Seeding in Alberta was two weeks later this year than last.

A second party of Swiss immigrants recently arrived at St. John award the Melia and are en route for the West, where they will engage in agriculture.

Twenty-two thousand immigrants to Canada from the United States were inspected on trains and highway crossings at the 33 points from Port Arthur to Kinggate, B.C., during March of this year.

To date the port of Vancouver has shipped or booked 17,000,000 bushels of wheat to the Orient and South America. The railroads expect at least 2,500,000 additional bushels to be shipped this way in the near future.

The memory of the early missionaries of the Oblate Order will be perpetuated by the Canadian Pacific Railway, and several stations on the extensions of their lines between Kipawa and Quince will bear names of early members of that organization which did so much for the colonization of the country.

There are thirteen new paper making machines being installed in Canadian paper mills this year. When erected and running full these machines will consume more than 250,000 additional cords of wood a year. Canada is already annually consuming and exporting more than 5,000,000 cords of pulpwood, representing the growth of a century or more on 1,250,000 acres of land.

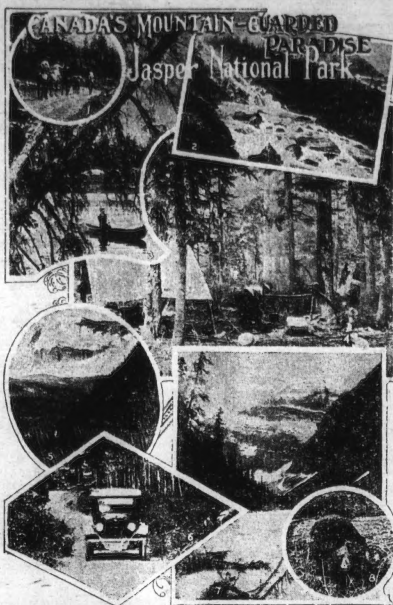

A new service for motor tourists desiring to pass between the mainland and Vancouver Island has been inaugurated between Bellingham and Victoria. The Motor Princess, with a capacity for fifty automobiles and 250 passengers, plies twice daily between the ports. This boat is motor driven and the first of its kind to be operated on the Pacific side of the continent.

In 1922 Canada produced 2,413 tons of salt cake, valued at \$54,894, and 1,329 tons of sodium sulphate, valued at \$42,719, according to government figures. There are a number of immense deposits of Glauber salts in the province of Saskatchewan, which are at the present time only in the initial stages of development, but it is anticipated that the next few years will see a considerable increase in production.

The Canadian exhibit at the British Empire Exhibition, to be held in London from April 20th to October 31st, 1924, is to be financed, controlled and directed by the Federal Government. The estimated cost is \$1,000,000. The two Canadian railroads are planning exhibits on adjoining sites, each with a floor space of 10,000 feet. The rest of the Canadian Pacific exhibit is estimated at \$500,000.

The Canadian Pacific steamship "Empress of Russia," upon her last sailing, carried a shipment of Canadian frogs for Japan. Cool space was reserved in the hold for the frogs and the travellers were well packed in ice. On being taken ashore at Yokohama these frogs will be gradually warmed until they are ready to be let loose, when they will be liberated on the lawns of Japanese importers, with the idea of giving the Japanese a new industry in the production of frogs legs.

The Canadian Pacific Telegraphs have announced the following reduced rates per word for cable messages to the following countries effective to-day—Australia, 30 cents, Belgium 23 cents, France 22 cents, Germany 25 cents, Great Britain and Ireland 20 cents, Greece 35 cents, Hungary 33 cents, Italy 26 cents, Spain 23 cents, Switzerland 27 cents. The 25 cent per word rate to Great Britain and Ireland is still in effect for special rush cables. Corresponding reductions have been made in the rates to other countries in Europe and beyond via Atlantic cables, and the new deferred rates will be one-half of the full rates quoted above except to Great Britain and Ireland, where the existing deferred rate of 9 cents per word is unchanged.

Of the great Canadian Parks, Jasper National Park, which has an area of 4,400 square miles, is without a peer. Jasper Park Lodge, rustic in all its appointments, yet with every modern convenience for the comfort of tourists, has been established by Canadian National Railways in this paradise of the Canadian Rockies, to those travelers

who respond to the compelling lure of the mountains. Motor roads and trails for saddle or pack horses, reach out in every direction, making accessible this mountain fastness where bird and animal life is un molested and everything is as nature planned it, and which until a few years ago had known no other sound than the soft voices of nature. Horseback riding through this vast amphitheatre of mountains, is the most popular pastime, while hiking, boating and canoeing, as well as dancing, tennis, quoits and other summer sports occupy every minute of the day if so desired. Jasper National Park belongs to the Canadian people. To enjoy anything is to know it. Before travelling to foreign parts, Canadians should get acquainted with the supreme scenic areas of their own country.

Stony Plain and District

Articles intended for insertion in The Sun must be in the office not later than 5 p.m. Mo to insure insertion.

Owing to the continued rainy season, Mr. Schadeck is now working on several large orders for cave troughing.

Kelly's General Store is receiving a coat of paint this week at the hands of Decorator Williams.

Johnny Miller says the complete Ford touring car can be bought for \$866.

Mr. and Mrs. Fritz Ducholke are on a visit with their daughter at Medicine Hat.

Mr. John Ph Miller has secured employment in the City.

A rather heavy frost visited this district Sunday night, but no damage is reported.

Services will be held in St. Oswald's Anglican Church on Sunday, May 27, at 3 p.m., by Rev Mr Tackaberry.

Gus Zucht's new ten-passenger gas bus is now ready for the trips to the packing plant.

The stock and effects of the late Flem Stirling have been moved to Stony and will be sold on Saturday afternoon next.

Mr. Pearson, of the A. P. Grain Co was in town Monday. He has just finished an extended trip thru the districts west and reports a much larger acreage in crop than any previous year.

Mrs A Osterman, whose home is at Mewassin, was taken to Edmonton on Friday, to be treated for an old complaint.

It is understood that the Dept of Education will give out the information on June 1st as to the re-arrangement of School Inspectors, and who of the present staff will be retained as such.

Seeding in this district is about over, and the prospects of a good crop never looked better at this time of year, the recent soaking showers having done excellent work.

Why not arrange a definite plan for your boy by securing an Educational or Life Career Policy from Lloyd E. Wood, of Crown Life Insurance Co? Ten cents a day would do it. 835-6 Tegner Block, Edmonton.

Camrose sportsmen are declaring war on the crows, and are organizing crow hunts for every Saturday afternoon.

E. S. Bishop, Liquor Act Commissioner, has intimated his intention to visit Stony and explain the workings of the new ballot.

A Couple of Ray's New Jokes

Someone has discovered that it takes 140 nuts to hold a Ford together and only one to hold it in the road.

Not so many years ago a wag on was guided by its tongue in front. Since automobilism became fashionable, a number of motor cars are guided by the tongues in the back seat.

Pytel Property Up.

When the Pytel farm property was offered by auction on Saturday last, there were no bids on the 1-2 section, on which the Court had put a reserve bid of \$6,500. When the S.E. quarter was offered Mr. Hy Lutz Sr bid \$1,000, but there was no sale, as the reserve bid was \$3,200. On the N.E. quarter, the same bidder offered \$1,200, but there was no sale, as the reserve price was \$3,300.

All About Mexico!

Next Monday night, May 21st, at 8 o'clock, in Mike Ducholke's Hall, a lecture will be given, with about 100 lantern slides, made up of pictures taken by the committee on its trip thru Mexico. Very interesting! The lecture this time will be given in the German language. On a later date the same lecture will be given in the English language. Admission, adults 25c; children 10c.

Meeting of the Rifle Club.

A meeting of the Rifle Club was held Saturday evening, when a discussion took place on the advisability of allowing another shot when a marksman has fired a "dud" shell. The matter was settled, when a rule was adopted that, if a bullet leaves the rifle, it is to count as a shot and the score recorded. Arrangements were completed for the big shoot next Thursday.

About Our Farm.

Hon George Hoadley, minister of Agriculture, stated Friday that one half section of the Sedgewick demonstration farm had been sold to private parties who would farm it in first class fashion and maintain the equipment in good shape under the terms of sale.

The demonstration farms at Stony Plain and Athabasca will be operated by the department this season, no buyers being found who would take them off the government's hands at a satisfactory price. It is understood that the Sedgewick farm brought in the vicinity of \$16,000.

NOTICE TO RATEPAYERS OF
MUNICIPAL DISTRICT OF
INGA NO. 520.

At the meeting of the Council on the 5th inst. it was unanimously decided that some prompt action would have to be taken in order that the Municipality could realise on the large sum of arrears which are at present outstanding. The laws of this Province do not empower a Municipality to borrow money on the security of their arrears of taxes, so that, before this District can clean up the balance of its last year's accounts, these outstanding taxes will have to be collected.

In the case where the District owes a ratepayer for last year's road work this amount will be deducted, in the event of the said party owing arrears.

E. H. FIDGON,
Secretary-Treasurer.
